

FAM FUNCTION &
AESTHETICS
FACE, BODY, GYN, REGEN MASTERCLASS

NOVEMBER 17TH 2023

Cycle FACE

MODULE #7

THE UPPER THIRD

www.fam-masterclass.com

EDITO

Aesthetic eye medicine has made a huge impact on indications and treatment solutions concerning the orbital region.

Under-eye bags—the treatment of which was initially limited to surgical procedure—can now in many cases be treated or complemented by aesthetic medicine, notably with hyaluronic acid fillers.

Eyelids, eyebrows, temples, and under the eyes are difficult areas to treat.

Anatomical knowledge, though fundamental, is not enough. This region in particular demands a mastery of techniques and product knowledge to achieve great results and avoid side effects.

This «Ultimate course» is a hybrid one-day course fully dedicated to the eyes, available onsite and online.

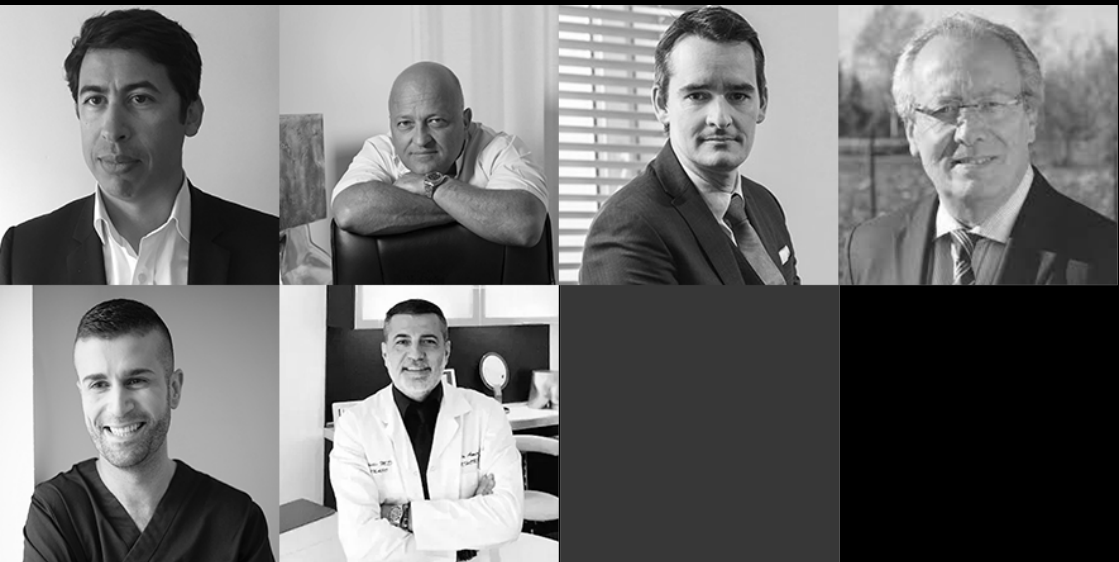

Registered practitioners enrolled onsite (limited to 20 VIP seats) will, in addition to the expert-lead conferences and live demonstrations, be able to benefit from personalized training performing injections on models ("One2One option").

Online participants will be able to connect digitally and follow all the conferences, live demonstrations, and dedicated video sessions, excluding the One2One training.

Register now for this unique and exceptional event

NOVEMBER 17TH 2023

LYON

EXPERTS

Dr. Fouad BELFKIRA Lyon - France

Dr. Frédéric BRACCINI Nice - France

Dr. Jérôme PARIS Marseille - France
