EDITO

Lip and smile beautification/rejuvenation is increasingly popular among patients of all ages.

Strong anatomical knowledge, as both a science and an art, is necessary to perfectly advise patients, avoid complications, and achieve natural beautiful results.

Lip beautification treatments can be complemented by mandibular contouring and other forms of perioral/lower-third face management addressing nasolabial grooves and marionette lines.

In all these cases, cosmetic doctors must master the management of adverse effects and complications to provide the safest treatments.

This "Ultimate Masterclass" is a 1-day hybrid course that can be attended onsite and online.

Our VIP onsite course is limited to 20 seats. "One to one" hands-on training will be available for onsite attendees, with assisted injections on models.

Online attendees will be able to follow all conferences and live sessions excluding the « one to one » hands on training sessions.

Register online to secure your seat.

OCTOBER 13TH 2023

IEMCEP,
13 rue Roux de Brignoles,
13006 Marseille

EXPERTS
